

Overnight care at home for people with health or aged care needs.

Overnight Care means now you can get help and support **overnight**, in your own home.

Brian needed a break.

Brian's wife Joan has dementia and needs 24 hour care. Brian has been looking after her for 3 years. He's done a great job but he's exhausted!

Our **Overnight Care** provider spent a couple of nights staying in the home to look after Joan. It was the first real break Brian had had in 2 years. Now we provide **Overnight Care** for Brian once a week. He says he doesn't know how he survived without it.

Lynne needed a hand.

Lynne lives alone, so when she came home from hospital and needed two weeks of rest, she needed **Overnight Care**.

Our experienced carer slept in the spare room and was on hand to help Lynne with food, medication and other needs.

Lynne says she doesn't know how she would have got through the first few weeks without it.

What help is available?

Overnight and sleepover services are available between 9pm and 7am, or as otherwise negotiated, 7 days per week.

We will work out with you how to best meet the individual needs of the person involved. In most cases this will be through HammondCare services, but if need be we can bring in additional support through other selected service providers.

The HammondCare girls were the most caring and compassionate people, whose patience and good humour enabled my mother to stay in her home much longer than it would otherwise have been possible."

"I was nearly at my wit's end, I would have had a breakdown if the pressure of such an intense caring role had continued."
